In 1979, the Pogue family believed that McKinney was a great place to grow their business. Nearly thirty years later, the Pogue family of companies continues to thrive -- **Pogue Construction, Pogue Engineering** and **The Pogue Group** have been a big part of McKinney's continued growth and quality of life. Today, Pogue Construction is one of the top commercial builders in Texas and was named the **Chamber of Commerce Business of the Year** in 2004. Pogue Engineering, a full service civil engineering and land surveying consulting firm, was honored in 2008 as a **McKinney Best** by the US Local Business Association. The Pogue Group works to manage the real estate needs of investors, brokers, commercial realtors and individuals.

With the help of MEDC, the Pogue companies will open their doors to their 30,000 SF corporate headquarters building in University Business Park at the end of September. When the Pogue family decided to expand, they chose to stay right here in McKinney. Each one of them has always known that...

McKinney was the right place to be.
